PROJECTS

PeerNotes Hub Collaborative Notes Sharing Website | February 2023 - May 2023

- In the PeerNotes Hub project, I designed and developed a user-friendly website to facilitate seamless sharing and exchange of academic notes among my college peers and friends. The platform allowed users to upload, organize, and access subject-specific notes, fostering a collaborative learning environment. I implemented user registration, note categorization, search functionality, and user-friendly interfaces for an intuitive experience. This project enhanced my web development skills and understanding of database management, while fostering teamwork and communication through user feedback and feature integration.
